

Technology solutions for intelligent hoteliers

System Features and Options

WEB-BASED ROOM STATUS DISPLAY

Our web-based guestroom status display allows the hotel to eliminate disturbance to guests, streamline housekeeping work, eliminate repeat visits and increase security. The system forms a part of our flexible

HANDHELD ROOM STATUS 'WAND'

Our handheld Fluke testers can be issued to housekeeping and operation personnel and can help them eliminate disturbance to guests. It is a proven and cost-effective method to improve service and guest experience.

WIRELESS PALM PILOT BASED ROOM STATUS DISPLAY

The palm pilot based wireless (802.11b) is connected to a central, real time server to deliver critical room occupancy data to better manage work flow, reduce interruption to guests and increase security.

SLIDING WINDOW AUTO SHUT-OFF

The sliding door helps prevent further waste of energy by automatically shutting off HVAC system when a sliding door window is left open for longer then 2 minutes.
